AIRPA

Connect.
Automate.
Power.

▶ ▶ ▶ ▶ ▶

Connects all your systems and applications, including email.

Meaning **connected data** that you can **access and view from one platform.**

Connected systems and data allows AIRPA to **automate workflows/repetitive tasks** and gives you key real-time **insight from our dashboards.**
ABOUT US

Our team brings a unique blend of Big 4 accounting and consulting experience, technology experts and successful small businesses owners.

CONNECT

We connect your systems and data.

- Log in once, only having to remember one password for improved security and efficiency.
- Search all your client records with a single request, and work on multiple clients from one place.
- See results from your bookkeeping software (Xero, Sage, Quickbooks) and every other system or app you use in a single, easy to read dashboard.
- Sync data across all records and systems automatically.
- AIRPA's next-level integration and automation system makes all this possible – and more.

AUTOMATE

- Automate repetitive tasks and create intuitive workflows.
- Create reports such as management accounts at the click of a button.
- Automate the information passed between multiple platforms meaning you no longer need to manually export and import between systems.
- Take actions on multiple clients from one place - in real time.

POWER

- Powering your firm to make real time decisions based on data collected from multiple systems shown to you in our dashboards.
- Smarter advice based on the insight you'll gain from at-a-glance advisory dashboards.
- A complete overview of your customers on one screen giving you the ability to answer questions immediately.
- Provide customers with a broader range of high quality, value add services and advice - enabling you to improve your revenue and profitability.
- View outstanding tasks, better plan your operations with powerful planning tools.
- Access key information and business KPIs on one screen pulled from multiple sources.

Because we connect industry leading cloud applications, you can always choose specialist software for each job, instead of relying on clunky built-in functions or poor quality add-ons. The best tool for the job, every time.

We believe API-based integration is the only way to ensure long-term stability and future proof your business, it's all about putting you in control.

Who is it for?

For accountants who want to automate repetitive work, improve accuracy and access client information quickly and easily. This frees up your time to accelerate growth and increase profitability.
